

The Euromarkets

ORIGINS of the EURO-DOLLAR MARKETS

In the late 1950s, expansion of a free flowing and unregulated international money market in parallel with rapid trade growth and rising international capital flows

- ☞ 1945-1971: Growing role of the US\$ as international means of payment and reserve asset “\$ as good as gold...”
- ☞ 1958: free convertibility of most Western world currencies = expansion of international capital flows
- ☞ 1960: Paris-based soviet Narodny Bank used \$ instead of rubles for foreign trade and payments. The Bank lent \$ to European banks to earn interest on \$-deposits.

MH BOUCHET/ SKEMA 2015

The roots of the Euro-dollar market expansion in the US banking regulations

- ☞ Refusal of the US Fed to abandon the Regulation Q interest rate ceilings on time deposits in the US.
- ☞ Regulation M set non-interest bearing reserve requirements as a proportion of banks' deposits.
- ☞ 1963: Interest Equalization Tax imposed by the US Fed to discourage US investors from investing in foreign securities. Thus, non-US borrowers had to sell securities outside the US market.
- ☞ ☞ American banks have been able to make higher profits lending in the Eurocurrency markets than they could lending at home.

MH BOUCHET/ SKEMA 2015

☞ 1960s: Expansion of US multinational corporations in Western Europe. Many US banks set up overseas branches in Europe

- ☞ 1960s: Rising US balance of payments deficit (hence increasing net US \$ balances outside the United States)
- ☞ Desire of Russia and Eastern European countries to keep their \$ balances outside the US (Paris-based Eurobank telex code)
- ☞ Britain's policy of £ replacement by \$ in trade financing operations
- ☞ Investment of \$-denominated official reserves outside the United States (hence, in the Eurodollar Market)

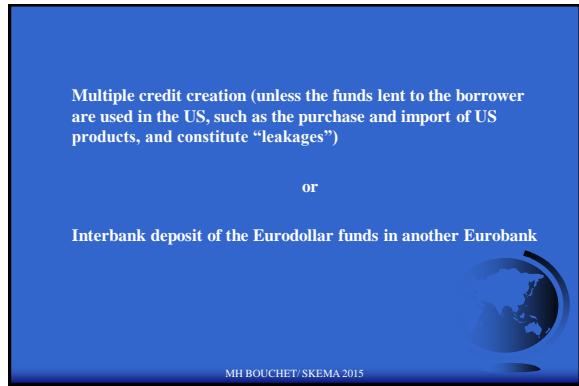

MH BOUCHET/ SKEMA 2015

Respective shares of London & the Caribbean in US dollar liabilities outside the US

- Investment in US T bill or interest earning CD = no credit creation (leakages outside the Euro-dollar system)
 - Investment in Government obligations outside the US = no credit creation
 - Euro-dollar loan to non-bank borrowers:
multiplier effect and on-going eurodollar credit expansion
- MH BOUCHET/ SKEMA 2015

- ## I- Eurocrédits syndiqués
- ❖ Instruments bancaires
 - ❖ Intermédiation financière
 - ❖ Volume et Evolution
- MH BOUCHET/ SKEMA 2015

Les Eurocrédits

- Juxtaposition de crédits accordés, du fait de leur montant important, par un ensemble de banques réunies dans un syndicat bancaire international qui mutualisent le risque de défaut, sous l'autorité et la coordination d'un **chef de file**.
- C'est un crédit à moyen terme, de l'ordre de 3 à 8 ans.
- On distingue les *term loans* et les crédits *revolving*.

MH BOUCHET/ SKEMA 2015

Qui emprunte?

- Inter-bancaire = 63%
- Non-bancaire = 37%
- Pays émergents = 9%
- Zone Euro = 34%
- USA = 26%
- Japon = 4%
- Offshore centers = 13%

MH BOUCHET/ SKEMA 2015

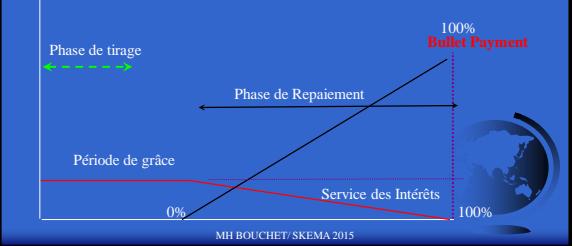

Les Eurocrédits

- Les « term loans » se distinguent par trois phases: tirage, période de grâce, et remboursement
- Les crédits revolving permettent une grande souplesse pour tirage et remboursement au gré du débiteur sur toute la durée de vie de l'emprunt, avec un plafond défini.
- Les eurocrédits syndiqués: syndicat bancaire permet la mutualisation des risques, sous la forme d'un Club « deal » (nombre limité de grandes banques) ou d'un syndicat international plus large. (underwriting)

MH BOUCHET/ SKEMA 2015

Les Eurocrédits

Crédits syndiqués à moyen-terme

Phases de syndication bancaire

- ☞ Lead manager ou chef de file (commission de direction ou upfront management fee or ***praecipium*** fee 1/2%)
- ☞ Placing memorandum (underwriting commitment fee pour prise ferme de sous-participations avec commission de garantie)
- ☞ Commission d'engagement sur les montants non tirés
- ☞ Publication d'un tombstone et distribution d'un prospectus
- ☞ Club deal (une dizaine de grandes banques internationales)
- ☞ Détermination des marges et commissions (management fee and upfront fee, participation fee 3/8%, commitment fee 3/16%, agent fee)
- ☞ Distribution of commissions de participations aux souscripteurs (underwriters)
- ☞ Banque AGENT (distribution semi-annuelle des paiements d'intérêt sur une base pro rata)

MH BOUCHET/ SKEMA 2015

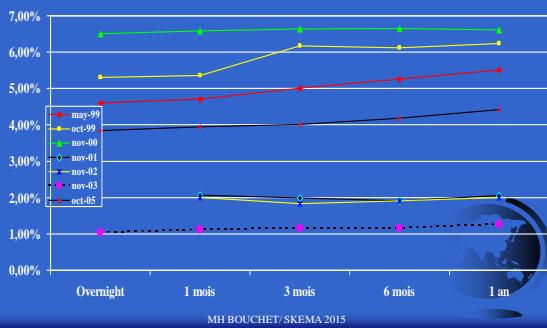

Taux de base sur les Euromarchés: taux flottant: LIBOR

- ☞ Base Rate: 3 or 6-month LIBOR + Spread en pdb
- ☞ Oct. 2007 = 4,85%
- ☞ Février 2015: 0,25%

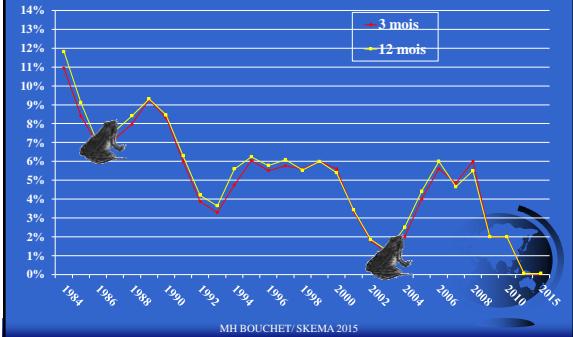

Spread, Interest Rate: Usually expressed in percentage points over and above a reference rate such as LIBOR or the prime rate in the country of the creditor. The spread added to the reference rate constitutes the interest rate applicable to the loan.

MH BOUCHET/ SKEMA 2015

Euro-Dollar LIBOR
1999-2006 term structure

Evolution du taux Euro-\$ LIBOR

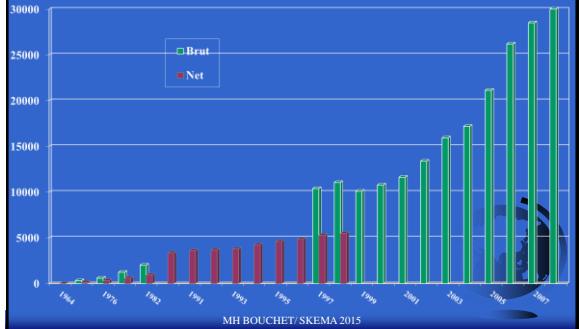

Volume "brut" et "net" du marché

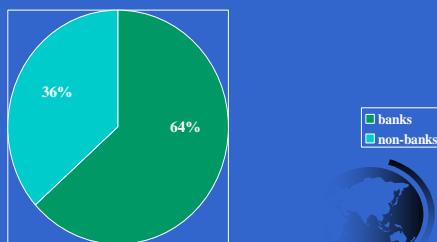

- The Gross size of the market comprises the overall international bank claims, i.e. cross-border claims in all currencies + local claims in foreign currencies.
- The Net size of the market is equal to the Gross size - interbank redepositing
 - Fin-1998: taille brute= US\$11,048 milliards
 - taille nette 1998= US\$5,485 milliards
 - Fin-2001= US\$12,000 milliards
 - Fin 2005= 21,125 milliards
 - Fin-2009= US\$30,500 milliards

MH BOUCHET/ SKEMA 2015

Composition of international banks' cross-border claims 2009

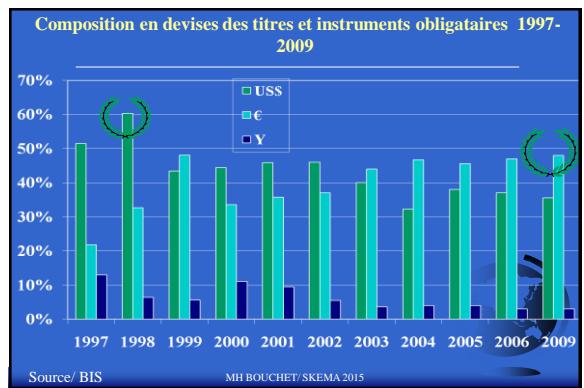

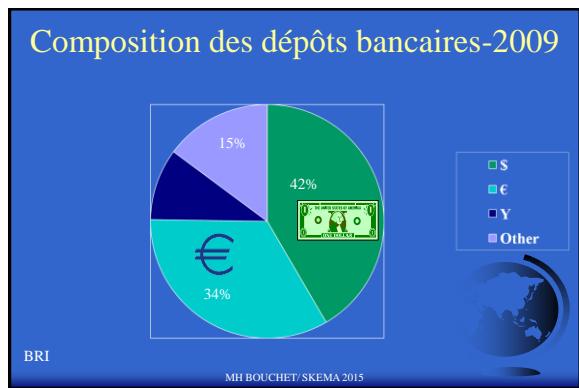

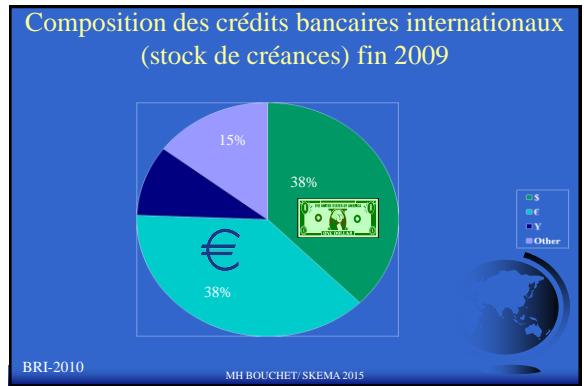

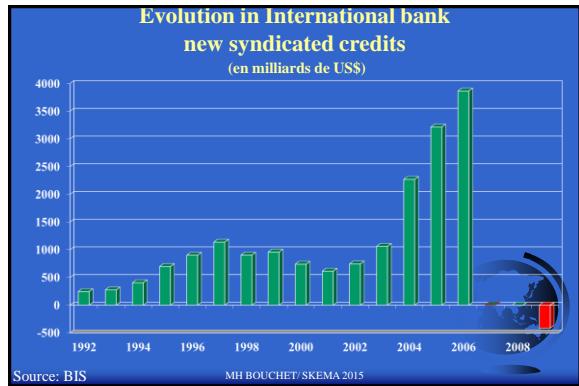

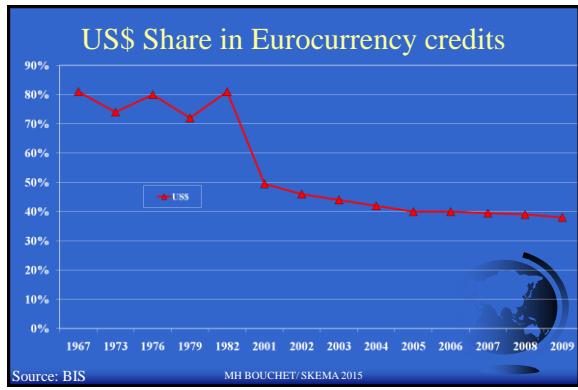

MH BOUCHET/ SKEMA 2015

Composition of international banks' cross-border claims on non-bank borrowers

MH BOUCHET/ SKEMA 2015

Marché des Eurodevises instruments de captation d'épargne (dépôts)

- Term deposits and CDs: negotiable instruments that can be traded on the secondary market. Because of higher liquidity, CDs pay lower interest rate (<about 10 basis point: a basis point is 0,01%). Very popular with company treasurers, because of low risk and high flexibility.

MH BOUCHET/ SKEMA 2015

Marché des Eurodevises instruments de crédits bancaires

- Eurocredits:** medium to long-term loans denominated in euro-currencies (> 1 year)
- Stand-by Credit:** A commitment to lend up to a specified amount for a specific period, to be used only in a certain contingency. (commitment fee paid on the unused portion of a facility)
- Euro-commercial paper:** short-term euronotes issued by companies < 365 days. Nominal value of notes > \$500,000, with corporate and sovereign issuers. Investment grade rating not required. Euronotes are unsecured debt securities <1 year

MH BOUCHET/ SKEMA 2015

Clauses Financières des Eurocrédits syndiqués

- Bullet Maturity:** One-time payment of principal at maturity.
- Currency Redenomination:** Switching of loans denominated in one currency or currencies into the currency of the creditor country or into ECUs. (The mechanism is intended to bring about a better match between the currency mix of debt service payments and the currency composition of external receipts.)
- Interest Rate Switching:** Selection of a new basis for interest calculations on an existing loan. The options may include LIBOR, a domestic rate, the prime rate or a fixed rate, to which a margin is added.

MH BOUCHET/ SKEMA 2015

II- Le Marché des Titres en Euro-devise

- ☞ Eurobonds: appel direct à l'épargne institutionnelle et/ou privée
- ☞ Emission hors du pays de la monnaie d'émission (ex. Londres ou global bonds)

MH BOUCHET/ SKEMA 2015

Marché des Euro-obligations

- ☞ Déf.: Titres à moyen et long-terme (5/10 ans) libellés en devises émis par l'intermédiaire d'un syndicat bancaire international et offerts à des investisseurs sur les marchés globaux
- ☞ Le cours du marché de l'obligation est la valeur actualisée des flux futurs que le titre assure ($I + P$)

MH BOUCHET/ SKEMA 2015

Marché des Euro-obligations

- ☞ Obligations classiques à **taux fixes**
- ☞ Obligations à **taux variables** (FRNs)
- ☞ Obligations à **coupon zéro** (intérêts capitalisés)
- ☞ **Global bonds** (ex. IBRD)
- ☞ Emissions **garanties** (« collateralized » bonds): Brady's
- ☞ Obligations avec **option** monétaire ou à double devise (paiement d'intérêt ou remboursement dans une devise différente de celle de l'émission)
- ☞ Obligations **convertibles** en actions (remboursements en actions de la société émettrice à prix déterminé au cours d'une période spécifiée)

MH BOUCHET/ SKEMA 2015

EUROBONDS

- ☞ Eurobonds: long-term financial instruments issued by MNCs or country governments, and denominated in a currency other than that of the country of placement.
- ☞ Eurobonds are underwritten by a multinational syndicate of investment banks and simultaneously placed in many countries. They are issued in **bearer form**, and coupon payments are made yearly. No taxation (pas de « retenue à la source » pour les titres au porteur)
- ☞ The US\$ accounts for about 70% of eurobonds. Liquidity in the secondary market is monitored by Euro-clear. Highly tradeable securities. Mainly in London and Luxembourg.

MH BOUCHET/ SKEMA 2015

Clearing procedures in the international bond markets

- International Securities Market Association (ISMA)
- Euroclear (created by Morgan in 1968)
- CEDEL (Centrale de livraison des valeurs mobilières) created in Luxembourg in 1970
- Eurobonds are engraved certificates. Euroclear and Cedel have a network of custodian banks where the certificates are deposited in bearer form for safekeeping. They manage the clearing of transactions on settlement date.

MH BOUCHET/ SKEMA 2015

Montage et Procédures d'émissions

- Chef de file (lead manager) et agent
- Syndicat: management group avec co-chef de file
- Syndicat de prise ferme (underwriting group)
- Syndicat de placement (selling group): placement du papier auprès des investisseurs finaux sans garantie
- Trustee: banque extérieure au syndicat de direction dont le rôle est de protéger les investisseurs en suivant les paiements et l'amortissement
- Tombstones et roadshow

MH BOUCHET/ SKEMA 2015

Eurocurrency market Instruments

- **FRNs:** medium-term notes where the interest is fixed as a percentage above six-month LIBOR (amounted to \$283 billion in 1997 and \$259 billion in 1998). Negotiable and transferable securities with flexible interest rate, fixed interest periods, and issued in pre-determined and uniform amounts. **FRNs are directed at institutional investors**
- **Note-issuance facility (NIF):** A medium-term legally-binding commitment under which a borrower can issue a short-term paper in its own name, underwritten by banks which are committed either to purchase any notes the borrower is unable to sell, or to provide credit.

MH BOUCHET/ SKEMA 2015

Eurocurrency market Instruments

- **Equity-linked bonds:** convertible bonds or bonds with equity warrants (amounted to \$64 billion in 1997, and \$32 billion in 1998). Right to acquire equity stock in the issuing company (sometimes with detachable warrants containing the acquisition rights). The market value of an ELB is composed of the naked value and the conversion value.

MH BOUCHET/ SKEMA 2015

Eurocurrency market Instruments

- ☞ **Note-issuance facility (NIF):** A medium-term legally-binding commitment under which a borrower can issue a short-term paper in its own name, underwritten by banks which are committed either to purchase any notes the borrower is unable to sell, or to provide credit. Issuing procedures with arranger or placing agent and tender panel.
- ☞ **Stand-by credit:** A commitment to lend up to a specified amount for a specific period, to be used only in a certain contingency. (commitment fee paid on the unused portion of a facility)

MH BOUCHET/ SKEMA 2015

Euromarket financial instruments

- ☞ **Revolving Underwriting Facility (RUF):** Medium-term facility provided by banks on which the borrower can draw at any time of its life, usually certificates of deposits (CDs) or short-term promissory notes. Banking agents attempt to place these securities in the market. Maturities range from 1 to 9 months and carry a Libor-related coupon.

- ☞ Merrill Lynch
- ☞ JP Morgan
- ☞ Salomon/Citibank
- ☞ RBC
- ☞ Paribas
- ☞ Barclays
- ☞ Commerzbank
- ☞ Credit Suisse First Boston

MH BOUCHET/ SKEMA 2015

Eurobond Market

- ☞ By spreading the risk among thousands of investors, both private and institutional, as opposed to a handful of banks in the loan market, the bond markets lower the cost of risk and thus reduce the cost of funding for companies and other borrowers. This in turn enables companies to raise larger amounts of debt.
- ☞ Many companies took benefit of the depreciating euro in the first half of 1999 to borrow in Euros and swap the proceeds into US\$, which had an immediate downward effect on the value of the €, hence the link between the euro's weakness and the popularity of the euro-denominated bond market (US\$300 b worth of securities issued in euros during the first half of 1999)

MH BOUCHET/ SKEMA 2015

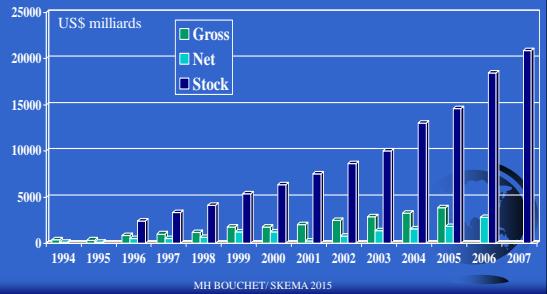

Emerging Markets Eurobonds

- High risk/high yield with low default track record (premium of 20 basis points compared with US corporate borrowers for identical ratings)
- historically, defaults only in the 1930s and late 1980s but recovery rate is better for sovereign debtors than corporate debtors (75% vs 40%)
- problem of comparability of treatment with Paris Club and London Club debts (Pakistan, Ukraine)
- Market risk remains high due to lower amounts (US\$250 b for sovereign bonds vs US\$600b for US corporate bonds) and concentration on 5 countries (Argentina, Mexico, Korea, Brazil and Russia)

MH BOUCHET/ SKEMA 2015

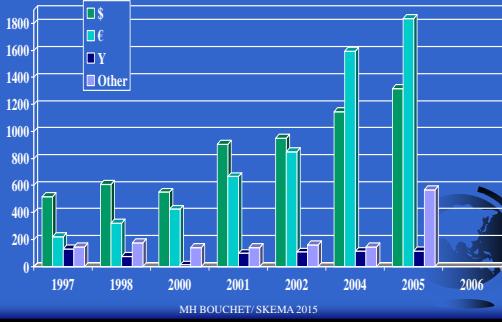

Le Marché des Eurobonds

Gross= completed new bond and note issues in US\$ billion

Principaux Emetteurs de « Euro denominated convertible debt »

- ☞ France Telecom € 6.2 billion
- ☞ Vivendi Univ. € 2.8 billion
- ☞ Olivetti € 2.5 billion
- ☞ PPR € 1.4 billion
- ☞ Lafarge € 1.3 billion
- ☞ Artemis € 1.2 billion
- ☞ Danone € 1 billion

MH BOUCHET/ SKEMA 2015

Clauses Juridiques des eurocrédits syndiqués

- Problem of “comparability of treatment” between various categories of creditors:
- Axiom: *an emerging market is a market from which you cannot emerge in an emergency!*
- Ex.: Paris Club insists on involving **Eurobond investors** in refinancing and restructuring workouts. Test cases: Pakistan, Russia, Ukraine, Romania, Ecuador and Venezuela (US\$60 billion question!); Rumania alone owes US\$863 million eurobonds (i.e., tradeable instruments)

MH BOUCHET/ SKEMA 2015

Clauses Juridiques des eurocrédits syndiqués

- pro rata sharing**: A legal covenant in commercial bank agreements which specifies that debt service payments are to be made through the agent bank for allocation on a pro rata basis to all creditor banks. Further, payments received or recovered by any one lender must be shared on a pro rata basis with all co-creditors under the loan agreement. Thus, no one lender may be placed in a more favorable position than its co-lenders with respect to payments received and/or recovered.
- cross-default**: A legal wrinkle which allows one creditor to declare default and exercise its remedies against the borrower in cases where **other loans** of the borrower have been suspended, terminated, accelerated or declared in default by other creditors.

MH BOUCHET/ SKEMA 2015

Clauses Juridiques des eurocrédits syndiqués

- Prepayment clause**: The prepayment clause is a standard clause in loan agreements between a debtor and a creditor bank. In its various forms, it can provide the debtor with the opportunity to accelerate repayment of the loan on a voluntary basis and/or provide for acceleration of repayment due to changes in laws affecting the creditor. In rescheduling agreements, the clause is intended to prevent the obligor to grant a preferential repayment schedule to other banks which have not signed the convention and which would be paid ahead of normal maturity terms.

MH BOUCHET/ SKEMA 2015

Clauses Juridiques des eurocrédits syndiqués

Clauses Juridiques des eurocrédits syndiqués

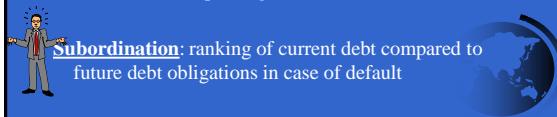

- Mandatory repayment clause**: standard clause in loan agreements that stipulates certain circumstances under which repayment is accelerated. The debtor, by being obligated to prepay any one creditor, must repay all lenders on a pro rata basis. In the context of rescheduling agreements, the provision is intended to neutralize "free rider" banks which do not participate in debt restructuring and new money agreements. The provision applies across the universe of public sector borrowers so that a voluntary prepayment of one or more credits by one borrower would trigger mandatory prepayment not only by that borrower but also by the other public sector borrowers.

Ex. Ecuador's default on Brady bonds in October of 1999!

MH BOUCHET/ SKEMA 2015

Clauses Juridiques des eurocrédits syndiqués

. **Negative Pledge**: cette clause protège les prêteurs d'un risque de subordination en interdisant à l'emprunteur de gager des actifs qui donneraient un rang supérieur à d'autres créanciers, par des garanties de remboursement privilégié.

MH BOUCHET/ SKEMA 2015

Clauses Juridiques des eurocrédits syndiqués

Optional prepayment provision: The optional prepayment provision permits the borrower to prepay all or part of the loan provided it prepays all lenders under the agreement on a pro rata basis.

Pari-passu clause: la dette contractée vis à vis du syndicat des eurobanques a le même rang que celui des dettes contractées ultérieurement, et elle n'est donc pas subordonnée à d'autres créances de rang supérieur.

MH BOUCHET/ SKEMA 2015

Clauses et conditions de qualité de signature

- ☞ Elles indiquent les conditions que doit respecter l'emprunteur, public ou privé:
 - ☞ ratios d'endettement
 - ☞ cash flow
 - ☞ rentabilité
 - ☞ liquidité et solvabilité
 - ☞ notification en cas de défaillance
 - ☞ actions requérant l'approbation du prêteur

MH BOUCHET/ SKEMA 2015
